

Technical Seminar & Engineer Course

Product Show

◆ Why liquid leak detection technical seminar & What is it about?

TTK is a pioneer in **digital liquid leak detection** technology. We are proud of providing this advanced solution to serve worldwide clients.

However, leak detection is still a novel subject for many. Thus, we are conscious of this mission - transfer the "know - how" to the operators. Only when operator understands the capacities of the system and transfer them into practical cases, high performance of the system can be finally showed out.

Our goal is to help every operator to find at ease to operate this technology at end of seminar.

◆ Who should attend?

This technical seminar is considered as a course to engineers, it is aimed at the wide range of building services.

Generally, senior and junior Electronic & Mechanical engineer, HVAC engineer, Hydraulic engineer also Project manager are welcomed to the course.

◆ How long it takes & Where can I attend?

Course: 60min

The detail course program is on following page.

The course is presented at clients' own premises.

◆ Who give the course?

Asia Pacific Viviane Yu
Roy Mak
Goy Jwee Tong
Bryan Lin

Europe Viviane Yu
United Kingdom Vikrant Deshpande
Kevin Farrow

France Renaud Chebassier
Timothée Sainsard
Esméralda Alves

Germany Horst Walter

Belgium
Switzerland Guillaume Baratte
Italy

Middle East Christophe Galmiche
Dubai

Please contact us for the country/region that you are interested to a technical seminar, our staff will try to meet your requirement.

Technical Seminar & Engineer Course

Product Show

◆ **Basic Course** (60 minutes)

Warm Up (~5 min)

A brief presentation about the subject of seminar

Speakers & Participants self-introduction

Technical Session (~15 min)

Where leaks come from & where is leak detection system needed

Basic technical operating principles of various systems

How to select a monitoring system fits your needs

What makes up a digital leak detection system

Examples & Typical Applications

Hand-on demonstration & group exercise (~15 min)

Every participant takes part in a water leak detection simulation

Software demonstration

Q & A (~15 min)

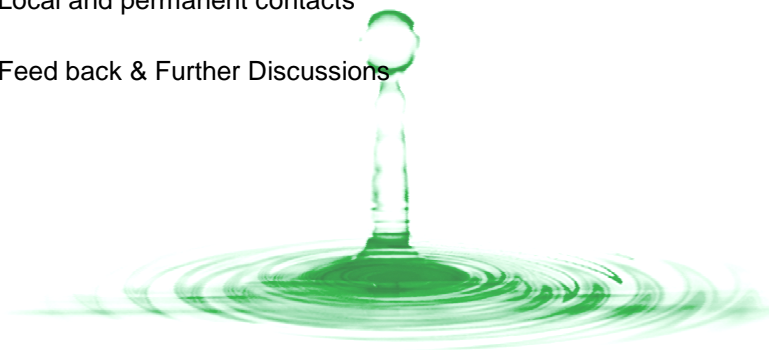

Frequently Asked Questions

Conclusion

Other useful information & Refresh time (~5 min)

Local and permanent contacts

Feed back & Further Discussions

Course introduction

Basic liquid leak detection knowledge for all level engineers. Focused on liquid leak detection knowledge and system demonstration as well as product feature analysis.

Contact us if you have special requirement concerning to our seminars.
