LIQUID LEAK DETECTION MANAGEMENT SOFTWARE

TTK — LIQUID LEAK DETECTION SYSTEMS

TTKWEB – SMART SUPERVISION FOR LIQUID LEAK DETECTION

TTKweb is the central software that brings all your leak detection systems together in one place.

From real-time monitoring to full system configuration, it gives you fast visibility, instant alarm response, and secure multi-site control — all in a single interface.

Ideal for multi-building campuses, data centers, and for remote monitoring teams requiring 24/7 visibility.

ONE PLATFORM, TWO ESSENTIAL MISSIONS :

Upload maps, draw cable paths, and create zones

Set up systems, adjust parameters, and manage access remotely

Monitor all panels and sense cables across sites in real-time

View pinpoint leak locations on dynamic maps

Navigate the full installation with an interactive view

Respond instantly with clear alarm details

Make faster decisions with centralized control

CONFIGURE

MONITOR

# FULL MULTI-SITE CONTROL IN A SINGLE INTERFACE

TTKweb centralizes all your panels and sense cables, even across different buildings and locations.

As an operator, you can instantly view the status of every connected system, switch between sites, and monitor critical areas in real time. All alarms, events, and cable conditions are unified in one clear dashboard, making supervision faster, simpler, and more reliable—wherever your facilities are.

INSTANT LEAK DETECTION & RESPONSE

When a leak occurs, TTKweb shows you:

1 Alarm details (time, date, location)

2 Precise leak pinpointing on the interactive map

3 Leak zone highlighted on the building

You can instantly:

Silence the buzzer on both the panel and the TTKweb interface

Acknowledge the alarm

Assess the situation and take action: temporarily disconnect a cable, view the event log, or call in a technician to intervene
